The shower bathtub from Artweger wins points with two unbeatable benefits: As a fully-fledged shower when you want to shower or as a comfortable bathtub for relaxation. It also enables comfortable access to the bathtub. Artweger has shown the way for the future with this idea; the most modern and most comfortable solution available at the moment.

# Live comfortably at home.

Or: The invisible insurance.

**Your guarantee for mobility in the bathroom.** ARTLIFT from Artweger is a prime example of what a modern bathroom should provide nowadays: Clean design, innovative technology and convincing comfort. **ARTLIFT** combines the advantages of the unique shower bath with a comfortable seat lift. In this way Artweger has created a first of its kind all inclusive solution for mobility in the bathroom. See for yourself!

### Simply get in.

It is so simple to get into the bathtub! The shower bathtub from Artweger makes getting into the bathtub or the shower simpler than ever before with its integrated door. Don't worry the door seals completely!

# Comfortable life.

## Take a seat.

The ARTLIFT seat lift is at its highest position and you can sit down comfortably. The seat has a skin-friendly Soft Touch surface which feels pleasant and provides optimum comfort.

### **Glide down gently.**

Glide down into a soothing bath: As soon as you push the button the seat is lowered and it brings you into a comfortable reclining position. The Soft Touch surface and the gentle motion of the seat make sure that you feel safe at all times.

## Comprehensive well-being.

The ARTLIFT seat lift is constructed to be especially compact as well as functional so that you can still feel unrestricted in your bathtub and can relax totally. And when you have finished bathing simply press the button and you rise back up!

*When the seat is at its highest position you can easily take a seat. While it is lowering, the backrest adjusts to the angle of the bathtub but the seat always remains horizontal. When completely lowered you automatically obtain a comfortable reclining position. The seat is firmly connected to the bathtub and moves safely and smoothly to a sitting or a reclining position.*

*As soon as you press a button the seat starts to move either up or down. Stop pressing the button and the seat stops automatically.*

## Comfort at the push of a button.

Extraordinary comfort due to the integrated shower door; that is probably the most outstanding feature of the ARTLIFT shower bath. This convenient, modern solution is supplemented by the seat lift. This innovation from Artweger greatly enhances and simplifies your unreserved enjoyment of the bathtub. Two buttons on the side of the bathtub – that is all you need to operate the ARTLIFT seat lift. As soon as you press a button the seat starts to move either up or down. Stop pressing the button and the seat stops automatically. While it is lowering, the backrest adjusts to the angle of the bathtub but the seat always remains horizontal. So when you are using it you automatically move from a vertical sitting position to a comfortable reclining position. When the seat is not in use it can be folded upwards and serves as a backrest. In this way it contributes to mobility in the bathroom but is not intrusive when showering or bathing when it is folded up.

*Are you using the shower bath but do not need the comfortable seat lift? Then simply fold up the seat. When folded up it requires almost no space and is not intrusive when showering or bathing. When the seat lift is needed again it is there at hand – without any tiresome lifting in and lifting out.*

*It is this easy to retrofit the ARTLIFT seat lift:  
1) The backrest is removed 2) the hoist is installed 3) the seat is mounted.*

## The ARTLIFT pre-installation preparation set. **Timely safety planning...**

If you order your ARTLIFT shower bath with a pre-installation preparation set from Artweger, you can retrofit the ARTLIFT seat lift at any time. It is only possible to install an ARTLIFT seat lift at a later date with this pre-installation set. The hollow for the hoist is covered by a comfortable backrest.

The ARTLIFT seat lift.

**... and when needed it is installed.**

With ARTLIFT you are on the safe side for the future. The ARTLIFT enables you even at a later date to use your bathroom alone and unaided. Equipped with the pre-installation preparation set you can order your ARTLIFT seat lift years later and have it installed at any time. An especially practical feature – it can also be uninstalled.

## In only 24 hours a new ARTLIFT.

Do you think ARTLIFT is perfectly suited to your requirements? Then don't wait any longer but rather make use of the fastest way to more comfort: The "24-hour bathtub exchange" can be carried out simply and quickly – without any great construction work. Partial renovation of your bathroom is made simpler than ever before. Simply exchange your old bathtub for an ARTLIFT and experience your bathroom from its most attractive side – shower, bathtub and seat lift all in one!

## New Look for the Bathroom with ARTWALL.

To make your change to the new ARTLIFT even simpler there is ARTWALL from Artweger. ARTWALL is a modern wall system for bathroom renovations. The wall panels are available in various colors and designs and are adhered directly to the existing substrate. That saves money and nerves – and in the shortest possible time your bathroom shines in all its new glory. It goes easy on your wallet and on your nerves – and in a very short time your bathroom shines in its new glam style. ARTWALL has been especially developed for wet rooms and is especially easy to care for thanks to its smooth surface without grouting.

## Gentle luxury: Whisper jets & colored lighting

# The other kind of whirlpool.

Air is injected into the tub by way of 24 small, discreet jets. Just like effervescent champagne bubbles the tiny bubbles rise and massage your body gently. The jets are integrated ergonomically so that your whole body can enjoy their effect. The jets are integrated almost flush into the tub and therefore are not disturbing when showering or bathing. You can transform your bathtub into a sea of colors using the two colored LEDs which can be additionally activated. Create the mood you want at the press of a button.

### The advantages of the ARTLIFT AIR:

- Relaxing** - due to the very low amount of noise
- Hygienic** - due to the air system the disinfection normally required for whirlpools is not necessary.
- Convenient** - the jets are automatically blown out after bathing and showering.
- Comfortable** - ergonomic placement of the jets provides an equal effect throughout the whole bathtub.
- Practical** - the fine jets are integrated in the bottom of the tub and are not disturbing when showering or bathing.
- Economical** - low energy consumption, only 45W for the air system and 6W for the colored lighting.

### The colored lighting:

**Whatever you feel like having:** 7 colors: white, yellow, red, light blue, green, blue and violet

## Comfort down to the smallest detail.

*Making provisions can be so elegant. The comfortable backrest is delivered with the pre-installation preparation set which is invisibly integrated into the bathtub.*

*You are not in need of the ARTLIFT? Then fold up the seat and use your shower bath as usual for your shower or bath – with a maximum of freedom of movement.*

*The seat lift is firmly connected to the bathtub. If it is needed it is ready for use at any time without any tiresome lifting in and out of the seat.*

*Sophisticated and practical in every detail. It only takes one step to make the bath behind the seat accessible for simple and easy cleaning.*

*Elegant and functional: The mechanical safety lock from the ARTLIFT can be combined with the water inlet (optional).*

*The optional water inlet of the shower bath is unobtrusively integrated into the tub. The water bubbles up into the tub as if it would come from a spring.*

*The special complete door seal guarantees durable and absolute water-tightness of the bathtub.*

*The door handle which is easily used when standing, is at the side and equipped with anti-slip rubber on the underside.*

*ARTLIFT is available as an option with two integrated colored LEDs. At the press of a button seven selectable colors provide pleasant ambient lighting.*

## Maximum comfort for every bathroom.

The ARTLIFT is available in various sizes so that you can experience maximum enjoyment in your bathroom. The integrated shower door opens inwards which makes the ARTLIFT optimally suitable also for small bathrooms.

### Pre-installation preparation set for ARTLIFT models

- **Electrical connection 230V/50/60Hz required**
- The pre-installation set enables retro-fitting with a seat lift
- Tub is prepared for installation of the seat lift and the control unit
