Multiple awards:

Shower or bath? Not a question!

The bathtub of the future - the TWINLINE from Artweger.

Comfort and well-being are the most important features nowadays when it comes to bathrooms. Personal wishes and preferences need to be taken into consideration. The question which many people have to answer is - shower or bathtub? (One important question for many is whether to choose a bathtub or a shower.) The TWINLINE from Artweger does away with this decision because it is both – a bathtub and a shower in one! Due to its integrated glass door you enter the shower and the bathtub practically flush-to-floor. That is why the TWINLINE is the trend-setting alternative to a conventional bathtub or shower. It is pure comfort!

The bathtub of the future. *Simply more!*

You have never experienced such a comfortable bathtub. You open the door of the Twinline and simply walk in! The integrated door opens inwards to save space and provides you with comfortable, almost flush-to-floor access to the bathtub and shower. There is no side of the bathtub which is too high. Simply walk in and walk out. Nothing could be more convenient than that.

Spacious shower

For an even more comfortable shower experience, the tub of the TWINLINE 2 has a generous standing area. The TWINLINE 1, with its outer edged rounded shower door, even has an extra-large standing area. And the optional ARTGRIP coating ensures a non-slip surface when showering.

Full bath enjoyment

If you are going to choose a bath, then take one with maximum reclining comfort! The tub shape of the TWINLINE models is especially tailored to the needs of bathing. The depth of the bath tub and ample leg room is optimal for enjoying good long full baths. The ergonomically shaped tub and soft neck support provide a great deal of extra comfort.

I like beautiful things.

And I like things that work.

Comfortable access

With the TWINLINE you simply step in just like in a normal shower. The glass door opens inwards to save space and can be comfortably opened while standing.

Also for small bathrooms

There is no longer any need to decide between a bath and a shower. The TWINLINE is two in one. Even in smaller bathrooms it enables complete bathing and shower comfort including a near flush to floor access to the bath.

Models.

TWINLINE 1

- *Curvy bathtub with an extra generous shower area*
- *Rounded glass door for more space when showering*
- *Integrated seat in the shower*
- *Comfortable neck rest when reclining*
- *Mechanical locking system*
- *Access height 18 cm which can be reduced to 7 cm*

I like the angular types.

I rather prefer curves.

Also with a divided door
or bathtub door

TWINLINE 2

- > Straight bathtub with widened shower zone
- > Extra deep tub, 49 cm
- > Mechanical locking system, no power connection necessary
- > Access height 18 cm which can be reduced to 5.5 cm
- > Ideal for quick home improvements
- > Choose between a one piece door or a divided door
- > Also available as bathtub with door

TWINLINE 1

Bathtub or shower? Many of you have had to answer this question: You do not want to do without one or the other. The TWINLINE 1 is the first bathtub in the world that makes the decision for you because it makes room for both.

I want to sit in the shower, too.

The TWINLINE 1 *In detail.*

With the TWINLINE 1 from Artweger your bathroom becomes your zone for individual comfort. The sophisticated design of the door makes it possible: Easy to get in and out of just like in a shower. More freedom of movement due to the rounded form of the bathtub. The integrated shower door made of safety glass provides protection from splashes and

a reliable sealing. In addition the TWINLINE 1 offers a great amount of comfort. Thanks to the integrated neck rest you can lie back fully relaxed when taking a bath. A seat which is integrated into the side of the bath enables you to carry out personal hygiene in a most comfortable way.

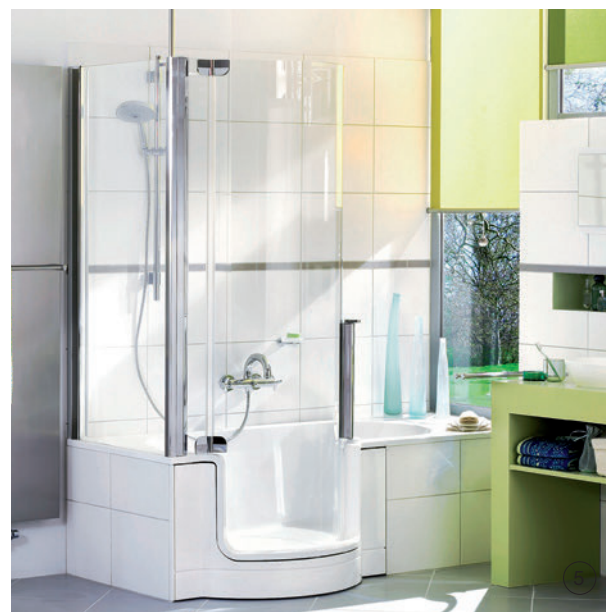

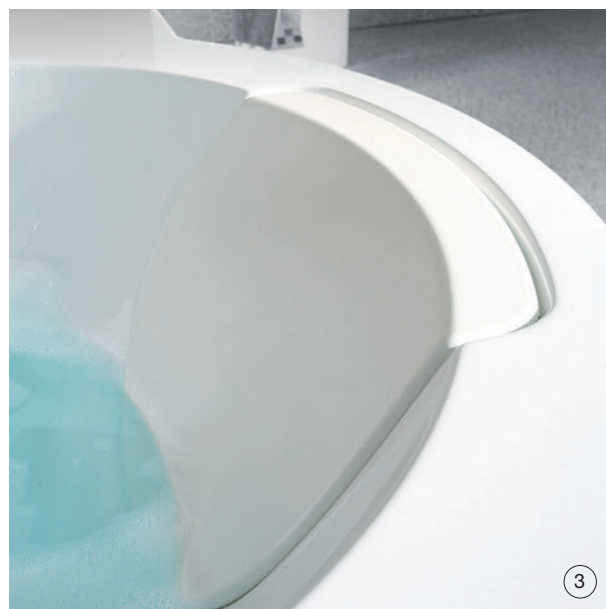

1

I want maximum comfort when bathing.

- 1 *Access to the TWINLINE 1 can be reduced to 7cm.*
- 2 *Take a seat! An integrated seat encourages you to carry out your personal hygiene most comfortably.*
- 3 *Ideal for relaxing. The soft neck support and the seat fit seamlessly to the edge of the bathtub and are removable for easy cleaning.*
- 4 *The shower area is very spacious therefore offering a great deal of freedom of movement.*
- 5 *The option with a glass side panel is available for all TWINLINE 1 and 2 models.*

TWINLINE 2

The TWINLINE 2 has a very special advantage: It fits into very small bathrooms. With its straight linear shape it takes up exactly the same space as a normal bathtub. Because of this you can exchange your old bathtub for a new TWINLINE 2 with a minimum of effort.

The TWINLINE 2. *Opens doors for everyone.*

The TWINLINE2 is not just a shower and bath in one. It offers a safe and comfortable access for the shower or bath. You can choose as you wish; either the clear elegant one-piece door or the model with a divided door. In any case you step

comfortably into the shower and bathing area at nearly floor level.

And for those that prefer to have the shower and the bath separated, there is the comfortable solution of an integrated glass panel.

I'll take my time.

It has to be quick with me.

With a one piece door:

Opens inwards to save space and the one-piece glass surface is easy to clean. The high level grip makes it easy to open the door when standing.

With a divided door:

One becomes two. If required the door can be divided, whereby the lower part opens inwards and the upper part swings inwards or outwards.

Bathtub door:

The right solution for those who want the full comfort of a bath. An integrated glass door opens inwards.

The TWINLINE 2. *More comfort.*

The TWINLINE 2 is not only very compact thanks to its linear design; the various options available make it very adaptable and it fits into even the smallest bathroom. Even so it offers great comfort and many advantages such as an extra deep tub for a capacious

full bath as well as almost floor level access.

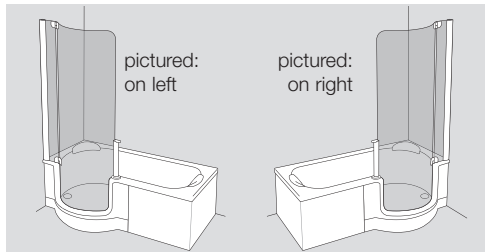

All in all the TWINLINE 2 is the perfect example of the bath of the future- with an integrated quality shower. If required, the TWINLINE can be fitted with an additional extra side panel.

- 1 *The optional backrest of the TWINLINE 2 offers additional bathing comfort. It is easily removable for cleaning.*
- 2 *The optional tub corner seat provides a large and comfortable seating area. It has an easy care, non-slip, synthetic surface and is removable.*
- 3 *The mechanical safety catch is connected to the plughole. It is only possible to fill the tub when the door is closed.*
- 4 *The optional water inlet is elegantly integrated into the tub. The water bubbles into the tub just like from a spring.*
- 5 *The hinges are fixed to the outer surface which means the glass inside surface is easy to clean*
- 6 *Optional glass panel on the shower door for additional splash protection. Swings in and out.*

Single-pane safety glass (ESG). In TWINLINE, special heat-treated safety glass (EN 12150) is used that is more impact-, shock- and temperature-resistant. If the glass breaks, glass granules form, reducing the danger of injury considerably.

Material

Tub material TWINLINE 1

Highly stable and durable composite material with glossy GELCOAT surface. The advantages: Warm surface, pleasant to the touch. Very smooth and easy to clean. Particularly durable and resistant to wear. Also resistant against chemicals and solvents. Can be repaired.

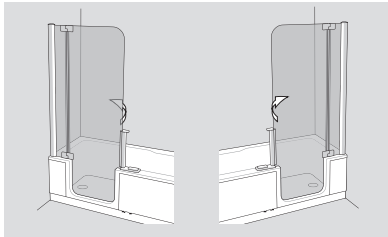

Tub material TWINLINE 2

New bathtub technology from Artweger with acrylic surface and sandwich construction = built up in several layers. **The advantages:** Optimum heat insulation, highly stable, especially effective sound proofing, pleasant surface, environmentally friendly and suitable for recycling because it is free of solvents.
